**Subject:** ABSTRACT (YET AGAIN)

Rick,

I received late comments on the abstract from Don Leyden. His main comment was that the title might be too broad and raise expectations that will not be met in the abstract. He suggests a change such as the following:

Current title: USING BIOMARKERS TO ASSESS EXPOSURE TO CIGARETTE SMOKE CONSTITUENTS: PILOT  
STUDY RESULTS

Suggested title: USE OF NICOTINE AND NNK METABOLITES TO ASSESS CIGARETTE SMOKE  
CONSTITUTENTS: PILOT STUDY RESULTS

I've spoken with Kathy Mitchell and she is fine with the change without additional review by the MRB as long as it is agreeable with you.

If it is agreeable with you please let me know as soon as possible.

*Bettie*
